LOGISTICS MANAGEMENT

## OUR MISSION

Our mission is to provide increased profitability through reducing transportation expenditures by leveraging MCG resources and expertise.

## MCG LOGISTICS

MCG Logistics is a division of MCG Solutions. Our specialized team has 25 combined years of industry experience. Our expertise is not just limited to carrier negotiations, but also from personal knowledge of the carriers' internal pricing and cost structures. As an advocate on behalf of your company, we are committed to providing an independent and thorough analysis and cost saving solutions.

## HOW WE CAN HELP

Our role as your independent logistics consultant is to negotiate highly competitive pricing contracts with your domestic, international and heavyweight carriers in order to reduce expenses and improve service levels. We strive to build a strategic partnership with your organization by understanding your unique transportation needs and through our comprehensive RFQ process, deliver cost reduction solutions to you. We want to partner with you beyond being a consultant, but to provide quantifiable results!

## NO-RISK

Our analysis is at no obligation to you, as our service fee is contingent upon the ability to reduce your shipping expenses. MCG will invest our time & resources to find out how we can best impact your bottomline. Our business model allows you to review our findings and comprehensive analysis before committing to any rate/contract changes with your logistics carriers.
